## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-8, drawn to a valve assembly, classified in class 251, subclass 129.15.
  - II. Claims 9-16, drawn to a solenoid for a valve assembly, classified in class 335, subclass 256.
  - III. Claims 13-22, drawn to a control circuit for a valve, classified in class 251, subclass 129.01.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I-II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a valve assembly not using the solenoid design of II or the control circuit of III, invention II has separate utility such as a solenoid not using the design of valve assembly I or the control circuit of III, invention III has separate utility such as a control circuit not using the valve assembly of II or the of solenoid design of II. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 2832

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
